4.2.18

Do not inhale gases / fumes / aerosols.

- **Breathing equipment:**
  Ensure good ventilation/exhaustion at the workplace.
  Use suitable respiratory protective device in case of insufficient ventilation (exceeding the workplace limit values, formation of aerosols).

- **Protection of hands:**
  Protective gloves.
  The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

- **Material of gloves**
  Nitrile rubber, NBR
  The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

- **Penetration time of glove material**
  The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

- **Eye protection:**
  Tightly sealed goggles.

- **Body protection:**
  Protective work clothing.
