4. **FIRST AID MEASURES**

-Eyes: Hold the eyelids apart and flush the eye gently with large amounts of water for at least 15 minutes.

-Skin: Flush skin with cool water. Wash the exposed area with plenty of soap and water while removing contaminated clothing and shoes. Get immediate medical attention. Wash clothing before reuse and throw away shoes which cannot be thoroughly cleaned.

-Inhalation: Remove individual to fresh air and get immediate medical attention. If breathing is difficult, give oxygen. If breathing stops, give artificial respiration.

-Ingestion: Have person drink a glass of water immediately if able to swallow. Get medical attention immediately. Do Not INDUCE VOMITING unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person.

**EFFECTS OF OVEREXPOSURE**

-Acute: Skin: Major potential hazard. Causes severe burns with deep ulcerations. Eyes: Causes severe destruction and blindness. These effects can occur rapidly affecting all parts of the eye.

-Chronic: Skin: Repeated or prolonged skin contact would be expected to cause drying, cracking and inflammation of the skin. (dermatitis)

5. **FIRE-FIGHTING MEASURES**

-SPECIAL FIRE HAZARDS: Water will produce violent exothermic reaction.

-FIRE FIGHTING METHODS: Use CO2 Foam or Dry Chemical

-FLASH POINT: N/A

-FLAMMABLE LIMITS – LOWER: UNK   UPPER: UNK

6. **ACCIDENTAL RELEASE MEASURES**

-Personal precautions, protective equipment and emergency procedures

-Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Avoid inhalation, ingestion and contact with skin and eyes. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Ensure clean-up is conducted by trained personnel only. Refer to protective measures listed in sections 7 and 8.

-Environmental precautions

-Do not allow contact with soil, surface or ground water.

-Methods and materials for containment and cleaning up

-Stop leak if safe to do so. Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local/national regulations (see section 13). Flush away traces with water. For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway.

7. **Handling and Storage**

-NORMAL HANDLING

-Use smallest amounts possible in designated areas with adequate ventilation. Keep containers closed when not in use. Empty containers may contain hazardous residue. Avoid generating mists. Transfer solutions using equipment which is corrosion resistant. Cautiously transfer into sturdy containers made of compatible materials. Never return contaminated material to its original container. Never add water to solution, always add solution to water and provide agitation.

-STORAGE
