MATERIAL SAFETY DATA SHEET
FOR CHEMICAL EMERGENCY Spill, Leak, Fire, Exposure or Accident CALL CHEMTREC DAY OR NIGHT 800-424-9300

SECTION 1 - CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: LIQUID STRENGTH
24 hr. Emergency #: 800-424-9300
US DOT Hazardous Materials Registration No.: 061307-004-024PR
Commercial & Government Entity (CAGE) Code: 0YCK6

CHEMICAL NAMES & SYNONYMS: N/A
FORMULA: Proprietary
CHEMICAL FAMILY: Blended alkaline cleaner
SUPPLIER’S NAME: Fabriclean Supply of Kansas, LC
SUPPLIER’S ADDRESS: 14400 W. 97th Terrace
SUPPLIER’S CITY, STATE, ZIP: Lenexa, KS 66215
SUPPLIER’S TELEPHONE: (800) 832-0096

SECTION 2 - INGREDIENTS

</tbody>
</table>

National Toxicology Program (NTP) listed carcinogen

(Nota: The exact composition of this product, with respect to the percentages of its' reported ingredients and the presence of its' non-regulated ingredients [not reported], is proprietary information and is being withheld. In the event of a medical emergency, total disclosure will be made to the proper authorities.)

SECTION 3 - HEALTH HAZARDS IDENTIFICATION

WARNING! CAUSES EYE, SKIN, AND RESPIRATORY TRACT IRRITATION. NOT FOR HUMAN CONSUMPTION - THIS MATERIAL HAS BEEN SHOWN TO CAUSE TUMORS OF THE URINARY TRACT WHEN ADMINISTERED AT HIGH LEVELS TO RODENTS IN LABORATORY FEEDING STUDIES.

PRIMARY ROUTES OF ENTRY: Eye/skin contact. Inhalation. Ingestion.

POTENTIAL EFFECTS OF EXPOSURE

EYE CONTACT: Causes pain, burns, tissue destruction, eye damage and even blindness.

SKIN CONTACT: May cause burns, tissue ulceration, skin damage, and effects may be delayed.

INHALATION: May cause coughing, chest pain, irritation, decreased breathing capacity, and tissue damage to the lungs and respiratory tract. Inhalation of the liquid or mists can cause hemorrhaging lung damage and even death.

INGESTION: May cause diarrhea, vomiting, burns, tissue ulceration, internal breathing, and even death.

REFER TO SECTION 11 FOR TOXICOLOGICAL INFORMATION.

POTENTIAL EFFECTS OF OVEREXPOSURE: OVEREXPOSURE MAY CAUSE DAMAGE TO, DISORDERS OF, OR ADVERSELY AFFECT THE FOLLOWING SYSTEMS, FUNCTIONS, OR ORGANS: Destruction of all body tissues.

SECTION 4 - FIRST AID MEASURES

EYES: Object is to flush material out of eyes immediately, then seek medical attention. Immediately flush with plenty of water for at least 15 minutes while holding eyelids open to ensure flushing of the entire eye surface. Get medical attention.

SKIN: Immediately wash contaminated areas with plenty of water for at least 15 minutes. Remove contaminated clothing and footwear and wash clothing before reuse. Discard footwear, which cannot be decontaminated. Seek medical attention.

INHALATION: Remove to fresh air; if breathing is difficult, have trained personnel administer oxygen. If respiration stops, give mouth-to-mouth resuscitation. Get immediate medical attention. (Nota: Coughing, sneezing or other symptoms of upper respiratory irritation may serve as a warning of exposure to high airborne concentrations.)

INGESTION: DO NOT INDUCE VOMITING! Rinse mouth with water; give large quantities of water or milk to drink. If vomiting occurs spontaneously, keep head below hips to prevent aspiration. Give more liquids. Do not give anything by mouth to an unconscious or drowsy person. Get immediate medical attention. (Because rapid absorption may occur through lungs if aspirated and cause systemic effects, the decision of whether to induce vomiting or not should be made by a physician.)
MATERIAL SAFETY DATA SHEET

SECTION 5 - FIRE & EXPLOSION HAZARDS / FIRE FIGHTING MEASURES

Flash Point: NON COMBUSTIBLE

Extinguishing Media: Media appropriate for surrounding fire.

Special Fire Fighting Procedures: Fire Fighting Equipment: Fire fighters and others exposed to products of combustion should wear self contained breathing apparatus and impervious protective clothing. Equipment should be thoroughly decontaminated after use.

Unusual Fire and Explosion Hazards: None

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Steps to be taken if material is released or spilled: Contain large spills with dikes and transfer the material to appropriate containers for reclamation or disposal. Absorb remaining material or small spills with an inert material and then place in a chemical waste container. Flush residual spill area with water. Keep out of sewers, watersheds or water systems. Refer to Section 13 for disposal information and Sections 14 and 15 for reportable quantity information.

SECTION 7 - HANDLING AND STORAGE

Precautions to be taken in handling and storing: Keep container closed. Avoid breathing vapor or mist. Use only with adequate ventilation. Avoid contact with eyes, skin and clothing. Wash thoroughly after handling.

Empty container retains vapor and product residue. Observe all labeled safeguards until container is cleaned, reconditioned or destroyed. The reuse of this material's container for nonindustrial purposes is prohibited and any reuse must be in consideration of the data provided in this MSDS.

Strict controls should be employed to limit occupational exposures to NTA. In addition, the U.S. Environmental Protection Agency has recommended that NTA should not be used in shampoos, foods, hand dishwashing detergents, and other consumer products designed to have direct dermal or oral exposures.

STORAGE:
Do not expose to extreme temperatures.
Store in a cool, well ventilated place away from foodstuffs, reducing agents and acids.

SECTION 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION

Respiratory Protection: Avoid breathing vapor, fumes and/or mist. Use NIOSH/MSHA approved respiratory protection equipment (full face piece recommended) when airborne exposure limits are exceeded. If used, full facepiece replaces need for chemical goggles or face shield. Consult respirator manufacturer to determine appropriate type equipment for given application. Observe respirator use limitations specified by NIOSH/MSHA or the manufacturer. Respiratory protection programs must comply with 29 CFR 1910.134.

Ventilation Required: Provide natural or mechanical ventilation to control exposure.

Eye Protection: Where there is potential for eye contact, wear chemical goggles and have eye flushing equipment available.

Skin Protection: Wear appropriate protective clothing and chemical resistant gloves to prevent skin contact. Wear a face shield and chemical resistant clothing. Where splashing is likely, wear respiratory equipment and complete protective body covering.

Additional Protective Measures: Safety shower, eye bath and washing facilities should be available and easily accessible.

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Clear colorless

Odor: Slight

pH: 13.1 - 13.3

Solubility in Water: Complete

Specific Gravity: 1.31

SECTION 10 - STABILITY AND REACTIVITY

Stability: Products are stable under normal conditions of storage and handling.

Incompatibility: Acids, oxidizers, chlorinated hydrocarbons, metals including aluminum, copper, zinc, and brass. Contact with some metals may cause the generation of explosive hydrogen gas.

Hazardous Decomposition: No uniquely hazardous decomposition products are expected. If NTA powder is burned, as with any nitrogen containing organic material, CO, CO2, smoke soot and oxides of nitrogen can be produced.

SECTION 13 - DISPOSAL CONSIDERATIONS

Solutions of Nitrilo triacetate acid tri sodium salt
This material when discarded is not a hazardous waste as that term is defined by the Resource, Conservation and Recovery Act (RCRA), 40 CFR 261. Dispose of by incineration or recycle in accordance with local, state and federal regulations. Consult your attorney or appropriate regulatory officials for information on such disposal. This product should not be dumped, spilled, rinsed or washed into sewers or public waterways.

SECTION 14 - TRANSPORT INFORMATION

Proper Shipping Name: Corrosive Liquids NOS(contains potassium hydroxide)

Hazard Class: 8

Packing Group: III

UN#: UN1760

Sticker Required: Corrosive

Emergency Response Guidesheet: 154
SECTION 15 - REGULATORY INFORMATION

NFPA - NATIONAL FIRE PROTECTION ASSOCIATION: The National Fire Protection Association (NFPA) is a nonprofit, educational organization. The goal of NFPA is to promote the science of fire protection and prevention. With this aim, NFPA has developed information on the hazardous properties of many chemicals, which enables the user to come up with safe procedures during the chemicals' use, storage, and transportation. There are three categories of hazards: Health (H), flammability (F), and reactivity (R). Within each category, there are numerical ratings from 0 - 4, with 0 indicating no hazard, 4 indicating severe hazard.

HEALTH 2 / FIRE 0 / REACTIVITY 0

Proposition 65 - California: The State of California's Safe Drinking Water & Toxic Enforcement Act of 1986 requires the following label on this product: WARNING THIS PRODUCT CONTAINS CHEMICALS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER.*

* In January of 1994, the California Environmental Protection Agency established a no significant risk level (NSRL) for NTA. Formulated products containing NTA do not have to be labeled with a hazard warning statement due to the presence of NTA if exposures to these formulated products do not exceed the exposure level of 100 ug/day for NTA acid and 70 ug/day for NTA salt. Refer to Section 11 for OSHA Hazardous Chemical(s) and Section 13 for RCRA classification.

HAZARD COMMUNICATION: OSHA's Hazard Communication Standard initially went into effect November 1985/May 1986. It is OSHA's most comprehensive worker protection regulation. It provides for information and training for workers encountering chemical exposures in the workplace. The standard requires the use of labels and Material Safety Data Sheets for all regulated chemicals.

SECTION 16 - OTHER INFORMATION

This Material Safety Data Sheet has been prepared in accordance with OSHA 1910.1200(g) Hazard Communications Standard, Material Safety Data Sheets and American National Standards Institute Z400.1.

AS A GENERAL RULE, PREVENT AND PROTECT THIS PRODUCT FROM UNAUTHORIZED USE

FOR INDUSTRIAL USE ONLY !!!!!!

END OF REPORT

NAME: Robert C. Jaudon

UNK = UNKNOWN
N/A = NOT APPLICABLE
N/D = NOT DETERMINED
N/E = NOT ESTABLISHED

In accord with the philosophy established by the Occupational Safety and Health Administration's Hazard Communication Final Rule, 1985, this Material Safety Data Sheet has been designed to emphasize the hazardous portions (ingredient[s]) utilized in the total formulation. As a result, the information herein stresses the most hazardous component(s) only. By this approach, we feel better knowledge and awareness should substantially contribute to reduce exposure and injury to workers involved with the use of this product. The information supplied in this document is presented for exactly this purpose. As required by law, this data should be thoroughly read and made available to anyone who may be responsible for handling this material. All data provided relates to the concentrated product as shipped. Actual usage rates and further dilution will, in most cases, greatly reduce, if not eliminate, the potential for worker injury. Any and all chemical products should be handled with extreme care and only by authorized and informed personnel. Each aspect of your operation should be examined to determine if, or where, additional precautions may be necessary. All health and safety information contained in this MSDS should be provided to your employees or customers. It is your responsibility to use this information to develop appropriate work practice guidelines and employee instructional programs for your operation.

The information and recommendations provided in this Material Safety Data Sheet have been obtained from data we believe to be reliable. We provide no warranties, expressed or implied, or accept no responsibility for loss associated with the use or handling of this product. This information is offered for your review and consideration. Efforts should be extended to determine the applicability of this product for your specific intended use. We know of no medical condition, other than those noted in this Material Safety Data Sheet, which are generally recognized as being aggravated by exposure to this product.
