- Exposure controls

- Personal protective equipment

  - General protective and hygienic measures

    The usual precautionary measures for handling chemicals should be followed.

    - Keep away from foodstuffs, beverages and feed.
    - Do not eat, drink, smoke or sniff while working.
    - Immediately remove all soiled and contaminated clothing.
    - Wash hands before breaks and at the end of work.
    - Avoid contact with the eyes and skin.
    - Do not inhale gases / fumes / aerosols.

  - Breathing equipment:

    Use suitable respiratory protective device in case of insufficient ventilation (exceeding the workplace limit values, formation of aerosols).

  - Protection of hands:

    Protective gloves.
    The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

  - Material of gloves

    Nitrile rubber, NBR
    The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

  - Penetration time of glove material

    The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.
