

SULTRASPOT TINT

Pre-wash and post-wash stain remover for removing oil based stains

Application

- **SULTRASPOT TINT** is a solvent-based stain remover used for removing ink stains from garments.

Properties

- The following stains can be removed with **SULTRASPOT TINT**: varnish, ink, makeup, lipstick, etc.
- **SULTRASPOT TINT** can be used safely on almost all fabrics.

Use instructions

- For best results, apply **SULTRASPOT TINT** undiluted to the stain before cleaning.
- Gently work in the product with a scrubbing brush (do not rub!), so that the product has time to work.
- If there is a risk of the ink spreading, first contain the stain with glycerine.
- Rinse out the stain with a stain-remover gun and water.
- If the stain is still visible, repeat the procedure – if necessary, multiple times.
- Blow the stain dry with compressed air and clean the garment in the cleaning machine with the usual cleaning program for the garment.
- Important! **SULTRASPOT TINT** contains Butyl Acetate. Butyl acetate can damage fibres of, e.g., rayon and viscose. Therefore, take special care with, amongst other things, garment linings!

Physico-chemical properties

- Density : 0,78
- Flash point : >35°C
- Solubility in water : emulsifiable

Composition & Safety

- 5% -15 % non-ionic surfactants
- <30% aliphatic hydrocarbons
- Flammable

Meets European directives on the classification, packaging and labelling of dangerous chemical substances and preparations.

Storage

Use above 5°C. Store above 0°C

Packaging

Canister 5 kg
